FormBed

Large-area pin supports for assembly, logistics and AGVs

Conventional supports are made for one workpiece. The FormBed with its spring-loaded 14 mm pins adapts to any contour within seconds, whether at an assembly station or on a driverless transport system.

Manual FormBed m: placing and clamping by hand, form-fit and secure. Particularly economical when shapes change often.

Pneumatic FormBed p: the pins are frozen by pneumatic actuators. Safe hold even with low clamping forces.

Electric FormBed e: the pins are locked by an electric actuator once the workpiece is in position. Ideal for AGVs, where no compressed air is available.

FormBed m

Infinitely variable, mechanically lockable. Ideal for assembly, tactile measurement, X-ray, laser marking and pad printing.

Order no. 45.0830

External dimensions W x L x H (mm)	**125 x 250 x 108**
Clamping surface (mm)	**94 x 205**
Number of pins	**88**
Diameter of pins (mm)	**14**
Clamping mechanism	**manual**
Stroke (mm)	**32**
Max. holding force axial	**2,0 kN**

FormBed p

Pneumatically unlockable. Ideal for automated processes, storage stations for linked robot cells and post-processing stations with many variants.

Order no. 45.0832

External dimensions W x L x H (mm)	**170 x 318 x 108**
Clamping surface (mm)	**94 x 205**
Number of pins	**88**
Diameter of pins (mm)	**14**
Clamping mechanism	**pneumatic**
Stroke (mm)	**32**
Max. holding force axial	**2,1 kN**

FormBed e

Electrically lockable, directly integrated into the AGV. No workpiece-specific supports needed.

Order no. 45.0831

External dimensions W x L x H (mm)	**222 x 345 x 108**
Clamping surface (mm)	**94 x 205**
Number of pins	**88**
Diameter of pins (mm)	**14**
Clamping mechanism	**electric**
Stroke (mm)	**32**
Max. holding force axial	**2,1 kN**
