ALVERY SPANNTECHNIK GMBH – SERVICE NOTICE

Notice no.: SN-2026-04
Date: 8 April 2026
Product: FormVise 125 (symmetric), article 41.0852

Affected units: serial numbers 2511-0001 to 2602-0450.

Issue: the thread of the clamping screw can wear prematurely when the screw is tightened with 25 Nm.

Measure: until the clamping screw has been replaced with the reinforced screw kit 41.9125 (free of charge), tighten the clamping screw with max. 22 Nm. At 22 Nm the axial holding force is reduced to 8,0 kN.

Units from serial number 2602-0451 are not affected.
